Hi Kevin...does this work? This was sent to John Christensen (another manager of Jeffrey's island) just today...

John,

Attached is the AutoCAD DWG file as requested as well as a PDF of our prior survey and an aerial view. The contours were derived via aerial mapping and, therefore, have a limited accuracy. They also do not reflect any changes in topography since Mr. Epstein's purchase of the island. Also include in the CAD file are a roadway scheme we developed at his request. (Please let me know if the architect is using Revit or Civil3D and we can provide that file as well.

I would foresee the necessity of site specific topographic survey for any building design that goes beyond a conceptual stage.

Sincerely,
Ryan C. Wischart, PLS
President
