Hi [REDACTED],

I need to obtain an authorization from the insurance. Now for 04/10 I only have a 2:30pm and for 04/11 I have a 1:30 or 2:30pm. Let me know what works best.

Mr. Epstein can't eat 3 hours before the test and no caffeine 12 hours before. Water and medication is ok.

Thank you,

Mary

Great. HI Mary...May we please schedule a CTA scan for Jeffrey Epstein On Tues. April 10 or Wed. April 11? You may coordinate with me today...if we do not confirm something today, you will need to coordinate with [REDACTED] or Bebe who will be sitting in for me next week when I am on holiday (they are cc'd here) Our office number is [REDACTED].

thank you,

[REDACTED]

Assistant to Jeffrey Epstein

Good morning [REDACTED]. It's been a while since I heard from you. Any update on what Mr. Epstein has decided for Repatha, self pay or try insurance approval which means he needs new set of lipid profile. Please let us know so we can help him with the process of getting medication that will help him lower risk for cardiac events.

Hi Kristine...I received an email from Repatha to "learn how to fill your Repatha

prescription" ... did Jeffrey finally decide what he wanted to do? He has not been back to me with any news, but certainly doesn't mean he hasn't spoken to Dr. Shimony or you about it! Just wondering if I need to do something!???

Morning! Jeffrey has said yes to training tomorrow with Nurse Kristine. Do we know for sure if Jeffrey will be doing one dose a month or two? It should hopefully be one right? The nurse knows Jeffrey won't have the actual drug but says she can train without it. He has still yet to answer RE self pay or insurance.

wrote:

Sorry for the late response. Just finished with patients.

-Looking a labs sent from early this month, Lipids done was calculated as opposed to direct LDL. Insurance companies look for the direct LDL when approving medications because this is a more accurate count, therefore, representing a more accurate cardiovascular risk equivalent. When the triglycerides is high, such as in the case of Mr. Epstein, the lab cannot provide an accurate LDL count. As you can see there was no LDL value given

-If you want to proceed with insurance approval, he will need to re-take labs with direct LDL. He cannot start Repatha prior to rechecking labs because it will not be an accurate reflection of his baseline without medications.

-If he wants to self pay, Century Specialty Pharmacy ([REDACTED]) is willing to give him a 10% discount if he purchases minimum of 6 months. They will ship the medication over as soon as it's ordered and have it virtually the next day.

-Here is the breakdown of cost:

For the once a month injection  
\$1,250/month (**with 10% discount if he buys minimum of 6 months**)

For the twice a month injection  
\$1,150/month (with 10% discount if he buys  
minimum of 6 months)

Hope that answers all your questions. I will be available tomorrow if you have any questions. Please let me know what his decision is prescription to the pharmacy is pending his ok. Thanks

KK

Hello Kristine! I wanted to let you know I DID get Jeffrey's approval confirmed with Repatha and have been able to speak with a nurse on Jeffrey's behalf! A registered nurse is to call me within 1-2 business days to set up his training...truly hoping for next We, Th or Fri! I will be sure to let you know.

Some more questions:

-I understood from Dr. Shimony you will be contacting Jeffrey's insurance to find out about coverage and getting the \$5 co-pay card?

-Once insurance approves the medication, when will Jeffrey receive his meds? Hoping he can get 3 months of the medication at a time....let me know if his insurance approves this or how many months we can receive at a time...maybe it is more!?

-will you order Jeffrey a Sharps Container?  
The nurse was asking me with type of  
injection he will be getting and I do not  
know...she said there are 3 different ones...

I know you are busy and will get back to me  
when you can!! Thank you! [REDACTED]

I am so sorry if I can't respond right away  
since I am seeing patients with Dr.  
Shimony. I am on the [REDACTED] now with  
Repatha. It must have been a  
misunderstanding, they need the **patient**,  
**Mr. Epstein**, to give permission for you to  
set up his appointment. Repatha needs to  
be called again and choose  
reimbursement services for Mr. Epstein to  
give you permission moving forward with  
his training. I will also be faxing you a  
form to fill out and for Mr. Epstein to sign.  
This gives Repatha permission to assist  
him. Are you free to talk to avoid  
misunderstandings? Thanks

medication

Hi Kristine.

-I found Erica Peltz so no worries there! :)

-I called REPATHA to organize training, but they do not have him registered (which I did) and they tell me you must call them to give me permission to schedule the appointment?! Sounds like silliness to me, but what can I do!? She let me register Jeffrey so when you call give them his Acct #PP02BW57 and tell them [REDACTED] [REDACTED], Jeffrey Epstein's personal assistant, may coordinate the training session for him. Once you do this let me know and I will call them back. Would greatly appreciate it.

Thanks,

[REDACTED]

Injectable medication

Hi Kristine. Thank you so much for this. Let me find out from Jeffrey if he has lab work that includes cholesterol within past 30 days. I don't think he does but he has gone without me knowing before ♦. I'll call the number below to set up training. Have a good evening.

Hi [REDACTED]. Before we get started with the process, I need a copy of Mr. Epstein's recent labs including cholesterol with in the past 30 days. Please let me know if he does not have one so I can send an rx to get it done. We will try to get approval for his medication to avoid paying out of pocket and the company is willing to provide samples while working on his approval.

Please call 1-844-REPATHA to set up a training session and also \$5 copay card if medication approved.

Please let me know if you have any questions. Thank you

Kristine
