Nah, it just the easy / obvious workaround.
I can't imagine why it would reverse the order of scanned pages, unless the document was
    upside down in the feeder (face up instead of face down).

I can't see that being a configurable option — who would want that?!? — so I don't know
    where to tell you to look.

Is it difficult to scan the pages in reverse order (put the last one in first, etc)?
Are these double sided scans? Cause the only simple explanation I can think
    of is that the document is upside down on the feeder.

Hi James…when I want to scan and email a document here at Jeffrey's house the last page is attaching first and so on…until the first page shows up last in the email I attach it to…I am sure I have something easy to fix but I can't figure out what that is?…Can you help?
