ok, thank you...I called one gutter guy and he says he does not do 'half round gutter'...so I wanted to confirm that is what we had!

re the guy carpenter...If you remember his name in the middle of the night, let me know!

They are not copper they are aluminum. I forgot that guy's name but I will make a few calls. They are half round gutters. There are loads of gutter guys. Pick the mid range bid guy. But most are the same.

HI bob...couple of questions...what are our gutters made out of? they are not copper, right...also, do you consider them 'half round'? I need to get a gutter guy...next, what is the name of the guy that did the carpentry work around here...I think he is back in town....but his name escapes me!
