Subject: Watch Question

HI James...can you please advise what is best to do re watches for our overseas recipients? I went back to your original email and it seems you think it a small thing to order the watch in the US and ship to a different country since the watch uses the iPhones network first...? Can you confirm? The recipient will still be able to use the GPS and Cellular functions, or no? I was thinking we could have Valdson go to an Apple Store and have him place the orders then ship...but for the person in Russia, it would still be like sending the watch from the US...right?

>> This is my logistical mind at work, but the cell functions require purchasing watches specific for each country (and they don't work outside their home country)... it's really a small thing tho, because the watch will use the iPhone's network first anyway.
