Settings > Passwords & Accounts > Gmail > switch Calendar to on.
It must have turned off when we were having password troubles.

There's also a Google Calendar app installed on your phone, in case you want to use it instead/as well.

Hi James. My google calendar is not in my phone? Help. Critical I have it. It's asking me to go to settings and manage account. I don't want to mess anything up. I don't see 'manage accounts' in settings. (?)
