Subject: Re: My calendar is not on my phone?

I was in iCloud. Oops. Now in gmail. I turned calendar to the on position and It's asking if I want to "keep on my phone". I would think yes I want to keep on my phone. Other options are delete and cancel

There's also a Google Calendar app installed on your phone, in case you want to use it instead/as well.

Hi James. My google calendar is not in my phone? Help. Critical I
have it. It's asking me to go to settings and
manage account. I don't want to mess
anything up. I don't see 'manage accounts'
in settings. (?)
