Hi Lesley,

Thank you. It's definitely warmer than outside but no significant changes. I talked to Karyna so I will love our of 2 G today but will be staying at Karyna's while she is away.

Yeah it's freezing isn't it?

Thank you Lesley! :)

Ok. Sounds good. I'm hoping it gets warmer for you. It is really cold outside. You should not be cold onside!

Hi Lesley,

Sorry I have been pretty jammed at work I just got my lunch break!

I was home last night thought the night and this morning and it's a slightly

better than before but still cold. I asked Karyna to come to my apt when she is at 301 to feed cats if she can tell if there any difference because she was at my place previously with me and we even try to open and see if we can turn the heat to the maximum.

So she will see tonight and I let you know maybe also after speaking to je who i will probably see tonight or tomorrow morning

Thank you.

Of course Lesley.

I want more than anything else I want this issue be fixed ASAP so I don't have to go back and forward anymore.

But what he said is not a true. I am staying at my apt at nights and was there this morning until noon. I even checked the heat in case If changes after yesterday's repair but I barely elt any heat thought the litter so it is not warm at all. But I will let you know if I see any changes by tomorrow.

Hello [REDACTED]. The heat in your apartment is working well. There was a repair yesterday done on the heating system. The air conditioners were also winterized. The apartment is warm. Tomorrow a new dishwasher is being delivered and installed. We will also look at the ceiling and repairing that. Let me know if you need anything else.

Thank you Andrew.

Hi Lesley,  
thanks again for  
your help!  
Hi Andrew and  
Anthony,  
Thank you very  
much for your  
coordination in  
addressing the  
heating issue.

Could you please kindly update us from yesterday what exactly is the issue with the heating system in my apartment?

As of this morning, it still barely works. Cesar was at my apartment on Sunday and said that there is a need for additional lattice installation to let the heat to come through, is that correct?

Best,
