Subject: Re: Exact dimension needed...

Thank you Mike! this is great. I will be sure to remind him to give you the exact dimensions for the 'H'.

Hi [REDACTED]
I asked for dimensions for the 'H' in the helipad with regard to installing the lights that will define the 'H' from the air.
It was decided that the vertical members of the 'H' would be oriented as to be running due east / west.
Also that the single, white LED light would be in the center of the horizontal member of the 'H' to designate dead center of the circle.
So, what is still needed are definitive length and width of the 'H' (there are 8 total, orange lights that will define the 'H', 4 per side).
On the call he said tentatively 12' x 6'.

Hi Mike...Jeffrey wanted me to remind him to give you the exact dimension for the GSJ Helipad? is that correct? I don't want to send him a wrong email...you were discussing the 'H' in the center...

Can you confirm what I need to remind him?
