Hello Paul and thank you very much for this summary.  
[REDACTED]

On Jun 13, 2019, at 7:40 AM, Paul Gandy <[REDACTED]> wrote:

Thank you [REDACTED], yes the trip was very successful and clarified the project for us. We were able to meet with Michael and tour both islands and the facilities that were recently added. We also discussed the project goals for Michael which allowed us to narrow our scope of services from our earlier discussions about various cable routes, etc. Additionally, we have examined 18 months of previous electrical usage to assist us in confirming loads and capacity for the LSJ consumption. Michael also provided with information regarding the seawater RO plant and distribution pumping system for purposes of developing and scope for providing a water line over to GSJ.

We are currently preparing two separate scopes/proposals. One for engineering of an electrical power loop around GSJ, to be installed by Owner's contract forces and one for project management and/or turnkey

installation of the short run of submarine cable and water line from LSJ to GSJ including landslide power equipment and facilities on each side.

We are currently conducting some preliminary engineering activities in order to develop the scope and cost for each proposal and time frame for the work. We expect to have a proposal for the first scope of services (GSJ Electrical Loop engineering) to Michael for review on Monday, June 17th. The second proposal should come a few days after that as we are awaiting equipment delivery times and input from installation forces to complete the scope.

We also continue to speak with Michael as questions come up and we are speaking with Bioimpact as well to coordinate on the subaqueous permitting side of the crossing.

Thank you for assisting in setting up the visit and having us over.

Best regards,

Paul Gandy, PE

High guys, update:  
Nico Shaner and I will be arriving Sunday, June 2, AA Flight 1391  
2:57PM

We depart Tuesday, June 4, AA Flight 943 2:41PM.

We will have a car and we'll be staying near Redhook area...waiting for hotel/condo confirmation now.

Mike, I am assuming we will come there first on Monday to get a look

at the existing facilities as we talked about, discuss the recent/previous improvements, plans for both sides and thoughts on the project approach, etc. I assume you will want us to meet in Redhook on Monday morning for shuttle over but let me know if there are different arrangements, or let me know time and place. Also, we are completely flexible on schedule and, if one day isn't enough to see and discuss everything, then we will also have time on Tuesday morning.

My cell phone is [REDACTED]

Look forward to meeting with you all.

Thanks [REDACTED] I will forward flight details.  
It was our intent to rent a car/hotel on St. Thomas and meet at Redhook for trip over on Monday/Tuesday so we would have mobility to look at

previous work, etc.  
No need to impose  
on staff (except for  
the boat ride over)  
unless you have  
other plans for us.  
Let me know.

Regards,

Paul Gandy, PE

Hi [REDACTED]. How does this Monday, June 3rd work? We would travel down on Sunday giving us all day Monday and Tuesday morning, returning to Miami on Tuesday afternoon.

It will be myself and one of our electrical engineers as we need to review existing facilities at the site(s). This should be enough time.

Let me know and I will book travel arrangements.
