Subject: Your delivery from The Mark Restaurant by Jean-Georges has been accepted (10:49am)

```
// Required params:  
// - groupName: Data group name (e.g. "Layers")  
// - key: data key to log in headlights (e.g. "TotalLayers")  
// - value: data value to log in headlights (e.g. 5, true, or "png")
```

```
var headlightsActionID = stringIDToTypeID("headlightsInfo");  
var desc = new ActionDescriptor(),  
    groupName = String(params.groupName),  
    key = String(params.key),  
    val = String(params.val),  
    keyArray = key.split(","),  
    valArray = val.split(","),  
    numKeys = keyArray.length,  
    numVals = valArray.length,  
    numPairs = Math.min(numKeys, numVals),  
    i;  
  
desc.putString(stringIDToTypeID("eventRecord"), groupName); // This is the data group name, please make sure it's  
identical across all calls and is self descriptive
```

```
for (i = 0; i < numPairs; i++) {  
    desc.putString(stringIDToTypeID(keyArray[i]), valArray[i]); }  
  
executeAction(headlightsActionID, desc, DialogModes.NO);
```
