I'm ordering the casters for the outside dining chairs for LSJ from a website. They say the stem that I order needs to match what's existing already. This is a link to determine which stem I need to order:
<http://www.castercity.com/m=asure.htm>

I was thinking of getting the metal hooded ones in Windsor Antique, thought it might match the best with everything outside, or maybe chrome is better? What do you think? Also, not sure whether to get 50mm or 60mm
