Hi [REDACTED], just confirming the size...the 60mm has a wheel diameter of 2.36" and the 50mm has a wheel diameter of 1.97". Just confirming you want them to be larger than the existing and not the same size?

Hi [REDACTED]
Grip Neck Stem is the way to go
Existing are 2 inches hence would go for 60 mm

I'm ordering the casters for the outside dining chairs for LSJ from a website. They say the stem that I order needs to match what's existing already. This is a link to determine which stem I need to order:

<<http://www.castercity.com/measure.htm>>

I was thinking of getting the metal hooded ones in Windsor Antique, thought it might match the best with everything outside, or maybe chrome is better? What do you think? Also, not sure whether to get 50mm or 60mm
