Hi [REDACTED],

I have one question ◊=80◊ do you need the edges seamed or are the clean cut edges fine (it ◊=99◊ll be just like the sample you received)? A quick note: If we seam the ed=es it can lead to more distortion and/or gaps when butted together. My reco=mendation is to leave the edges as is. Please let me know ASAP as these are=ready to be shipped today.

Thank you!<=:p>
