Hey guys. I went to PC Richards yesterday to pick out new appliances for ████████████████. I am having trouble finding a refrigerator which will fit t=e current dimensions of what's there. All the current ones are 28" wide by 2=" deep by about 65" high. I can't find anything that's 28" wide that isn't d=eper than 29 inches, in which case it would stick out more than desired fro= the cabinets. I did find one however that's 27.5 wide by 24 deep, but 75" h=gh, which is too high with the cabinet above the fridge. I didn't have a ch=nce to specifically look, but wondering if it's doable to remove the cabine= over the fridge so we can fit a taller fridge in the space? I'm sort of at=a loss as to what to do about sourcing a fridge with the current dimensions=otherwise.
