I =poke to PC Richards, and they said it shouldn't be an issue at all to =witch out the dishwasher with this unit. The only thing they are saying =ould need to be done is for the electrical, an outlet would need to be =nstalled and possibly a valve attachment added to tap into the cold =ater, not just the hot. This unit does not require a vent. I'm pretty =ure we did this on [REDACTED] apt as well after the kitchen was already =nstalled and the dishwasher was in place. We took out the dishwasher =nd put in the washer/dryer after the fact.

Can you please =ouble check on this as I would really love to put in this unit as would = [REDACTED] in 8H. thanks

Hello Sarah , You =an change the existing dishwasher with another 24 " dishwasher but not =ith a washer /dryer because that would require the plumbing =nd waste line and vents to be changed . In order to do this =t the very least the bottom cabinets need to be removed on =he same side as the dishwasher to be able to break the wall =o access so work could be done . We just did this in an apartment =ecently the plumbing alone costs about \$4500 .The =efrigerator can be ordered because they can remove that one upper =abinet the same day as the delivery . Please advise what day =ou will recieve the delivery Thank you =ndrew

I was going to change out my dishwasher for the above =ll in one washer dryer. I was also going to put one in 8H to replace =he dishwasher.

Do you see any reason it won't work? Just want to =ake sure before I schedule it to be delivered and installed.
=br>

Also, Andrew, if you can pls let me know when the fridge can be =livered for 8H; if the cabinet above the existing refrigerator has =een taken down so the 75" tall one will fit.

I'd like to get the =ew appliances installed in 8H before the apt gets painted. =br>Thanks..
