Just checking in about the AC units for 10B, 10F and moving my living room unit to 10F, putting in a new one in my living room.

Also, any word from the plumber?

If that was the cause of the leak into the wood flooring, we don't want the same thing to happen again considering we just replaced the wood floors. Apparently one of the AC units in 10F is a 220volt (like the one I bought for my apt, but can't use due to the plug not being the same.) we can move the one from my apt to 10F, then put a normal AC in my apt. Can we set this up for sometime this week. I'm back in town tonight and will be in NY for a bit and would love to have a working AC in my apt. Thanks
