For the proof what would work bes= is to do a proof of the entire image scaled down, and then print a segmen= of the image at 100% to show image quality.

I'll get this info over to produc=ion and get back to you with an additional cost. Let me know if you need a=ything else. Thanks.

Thank you..

Do you think it's best to do a proof first that we could have for tomorrow, then he can approve that over the weekend and we can print the 8'x8' next week?

What size do you usually do for a proof?
