Subject: Re: revised flooring proposal

Hi Robert,

I will touch base with my building manager who is meant to place the order for me. Also, I'm reconsidering putting wood in the kitchen now! Is the satin poly finish durable for a kitchen, or would it need another coating of something?

Hi [REDACTED],
Have you reached a decision about your order?
Please let me know if there is anything else I can assist you with.
Best,

Most clean boards end up 6 to 9 inches wide, then very select ones go over 10 inches wide.

To make them 5" wide, they have to cut them again, then do the tongue and groove – this brings up the price around 20%.

Your order would be around \$1400 more for all same 5" wide.

The continental oak is always cheaper because the wood is simply cleaner – no matter the tree location, oak in Europe does not have so many imperfections / knots.

Best,
