Thank you...I do think a proof first is a better idea too! I would hate to print the whole thing and him want to change the coloring/contrast or something like that. If we could get the proofs tomorrow, that would be great, he can see them on Saturday and if he is happy with everything, we can print the 8'x8' next week.

Hi [REDACTED]

I do think a proof would be best.=I had not built that cost into the quote, thinking we'd be producing the whole piece tomorrow.

For the proof what would work best is to do a proof of the entire image scaled down, and then print a segment of the image at 100% to show image quality.

I'll get this info over to production and get back to you with an additional cost. Let me know if you need anything else. Thanks.

Thank you..

Do you think it's best to do a proof first that we could have for tomo=row, then he can approve that over the weekend and we can print the 8'x8' =ext week?

What size do you usually do for a proof?
