**Subject:** Tomorrow

Hey scott.. for tomorrow at 71st, the Epson Pro 3800 won't print for =ome reason from my laptop. I plug it into my computer, set up something =o print, then in the print box it says connecting to printer, then just =ays "Error" in the status section. It won't do anything. I've restarted =he printer, my computer, unplugged, replugged, doesn't help. On the Epson Aculaser on 5th floor, it is now putting a lovely yellow =ine down the middle of all my scans; not sure what that's from also on my laptop, the address book is doing that thing again where it =on't allow my to search names. I'd like to look into having a shared calendar with Lesley on our =calendars as well if you can show us how to set up. At 301, I have the 3 airport expresses for apts 11P, 8H and 10B to set =p for wireless.
