Hello Karyna,

=

Thank you for your call and this email with your sketch. You show a seat height back of 33". In most of our designs the standard seat height backs are 36". Can you live with a 36" height back or do you need a 33" height back for your windows or something? If so, we can have that customized height made for you. Also you show the seat width as 26". Is that OK with you or do you want us to take a look at a custom depth of 26" for you?

Do you need the outside backs to be finished or are they up against walls and could be unfinished?

To price this out for you we would need you to select a style of booth. You can choose one from our website

Subject: Custom dining furniture

Dear Jack,

We spoke earlier today regarding a project for a custom bench and dining tables.

Please find enclosed a preliminary sketch for the furniture. If we do tables with a 2.1/4" bright groove aluminum edges with a standard white laminate, could you please provide an estimate for the job?

Thank you very much!

Karyna
