Gary, I was speaking with JE about the Jado faucet in his powder room =nd changing the direction of the turn of the handle. This style also =omes with lever handles as an option, which usually only turn on and =ff in one logical direction for lever handles, which would be in the =irection which JE wants the cross handles to turn(the right handle to =urn to the right)  It doesn't quite make sense if you think of it that =ay that the handles can't be reversed in order to turn in the correct =irection..
