Hi Brandon, I will get back to you on this as soon as I can. Thanks.

Hi [REDACTED]

Our mill has just notified me that the peice that they were going to ship has a cut in it. They do have 2 other peices that are unharmed, the only issue is that one peice is 16.7 yards and the other peice is 13.12 yards. Can you please advise if there is a way you would like your peices to be (i.e. 10 yards from one peice and 7 yards from the other) or if there is a better way you would like it to be broken down.

Sorry for this inconvenience.

Best,

Brandon Quattrone
