Hi Anthony,

I am looking for someone to make a cover for my radiator and AC unit under the windows in the living room. I've attached a photo of what it looks like now along with a sketch of what I'd like it to be. I'd like three removable grates going across the front so I have the option to have the shelves and AC unit exposed or covered. There were removable grates there before which I think just had magnets to attach them. Would you be able to give me a quote to do this work? Thanks.
