>> Sorry this took so long, but the last panoramic photo of the ocean I sent to you was approved for printing! The only thing is, the large size price of the photo you had printed, the photo was only 54" tall in the sample, when the actual photo needs to be printed 57" x 530" and there needs to be about a 4" border of blank canvas around the photo to help with the mounting process. So overall the complete piece of material would be 65" x 538".
