Hi Penn! I was going over the plan for my window unit with Mr Epstein, and he suggests I should also have 2 grates in front of the AC unit and shelves, but have them able to slide on a track so I have the choice of having those sections exposed, or covering them if I don't want to see the AC in the winter, etc. Is this doable? I'm not sure the best way to think about the design. I will give you a call tomorrow to discuss.

Thanks!

Sarah
