I think they did something else with the floor, the sample does look much lighter, see below. Don't you think?

Hi Eric,

I am looking back at the pictures of the sample that we decided to go ahead with ( I put the red arrows on the photos). It does look much lighter then the finished version. Even looking at just the stained floor: it is much lighter, and we agreed on putting just the clear shiny coat. Did your guys put something else on it?

This is what it looks like now:
