I am told it still smells VERY b=d in 11P? when was the vent put in? do you think it needs time t= dissipate? or is this the old vent and it was checked and it'= working...I hate to say it, but if nothing else was done, then the i=sue still exists...something else needs to be done. It is not e=ough as it is even if the vent in that line is working...? It i= uninhabitable...unless you are a smoker too I'd think...=
