We are leading a genetic research revolution.

Dear Jabor,

Thanks to the participation of 23andMe customers like you, we arrive at scientific breakthroughs faster than conventional research.

Over the past 6 years, the 23andMe Research team has contributed to finding genetic links to cancer, depression, Parkinson's disease, migraines, fertility, heart rate, psychological disorders - just to name a few.

These discoveries pave the way towards prevention, treatments, and a healthier world.

This is the future of research, from Mountain View, California, and it's all thanks to your participation.
