yes, I agree 24" is too small.. that's what JE had mentioned for width, but doesn't seem practical.. not enough space for 2 plates and anything in between. I think we should go for 36"

24 seems to narrow, recommend at least 36" if people are going to eat at it?

Hi Sarah,

Hope you are having a lovely weekend ...

Attached please find our quote for your project and a few photos of our slab table and bench design. Please don't hesitate to let us know if you have any questions!

Very Best Regards,

Sharon
