I am in touch with Lenora. She said the documents you noted that were the most important are finished. But not the others as of yet.

Please translate the attached document for the breast ultrasound. The other page you saw is the same just with the films on top of it.

Thank you,<=font>

From the translator:

At first glance I do not see a breast ultrasound among these docs. There are two pelvic ultrasound pages, one with results, and the other with half the text cut off and two ultrasound pictures. There is a chest x-ray. There are two handwritten pages that are duplicates. Possibly the intent was to copy one half on one page and the other half on another page, but they are copies of the same image, so half the text on the left side page is missing in both copies."

The translator will deal with the documents she has but please check about this breast ultrasound and if possible resend.
