**Subject:** computer

Dear G - someone went to look at your computer and airport base last week. He cannot configure your airport base without your laptop - when you are next over he will come in and sort it out - he says it will only take a few minutes. He said that your computer has been badly damaged by the virus that it got. The only way to clear it up totally is to clear your whole computer, defragment it (or something like that) and reload the operating tools from scratch. Are you happy for this to be done (he did joke that it might be cheaper to buy a new computer!). He also said that if we get you connected to Broadband which is the quickest, cheapest, continuous internet access on the market it will make a huge difference to you (he gains nothing by us doing this as it is not through him) and he will then be able to link up your computer and your apple airport base and laptop. What do you want to do?

We are going skiing with the children this Saturday for a week - I still have the Range Rover here - is there any chance of you arriving between 29 March and 5 April - if so I will take the car back to London - otherwise I will do it when we get back.

Who were you dealing with at Thomas Goodes, do you want me to arrange for them to send the stuff to you in the States or has Yuni dealt with this.

I will be speaking to Barclaycard on the 27th to arrange for them to send you all the forms etc for you to fill out for the fraud people. Hope all ok Love Kxxx
