I do, I do.

To delete a mailbox in Eudora:

1. go to the window menu (in the menu bar)
2. Select Mailboxes
3. Click once on the mailbox you wish to delete.
4. then at the bottom of that window click remove.

This will remove the mailbox and its contents.

FYI - there is a new update for Eudora 6.0.1 out today.

Can i send an email with a huge attachment by that I mean a computer file) to this email address?

And what time zone are you on? I went to bed at 6 on saturday - woke up at 4 am yesterday and 5 today. I figure I am on European time now.

Morning - Miss me yet? how do you get rid of a mail box in Eudora?

G
