Subject: Hello from Scott

<x-flowed>
Hi G.

I wanted to let you know that I Spoke with Peter Basch's wife yesterday, and the family would love to continue the discussions we started with Peter. Please let me know if this is still a possibility. I should let you know that my own interest lies in digitally restoring some of the best works (this is how I originally met Peter). I am curious to know what you were thinking of when we last talked about this, so I can figure out the next step.

As far as your printer software, we are still waiting for the release of the new version! I would bail out and suggest something else, but this software is the only product I have seen that fits your requirements.

I hope all is well. We are just setting up our lab at NYU. When we are in full production, I will invite you down to see the operation.

Take Care,
