Some more PB issues

The extractor drier is so big is covers part of the electrical panel so you cannot open the panel - talk to Frank to come up w/ solution

Tell John that I want to know when people want access to the hse to work esp on w/e. 2 guys showed up to hang the shelves in the laundry room even if they want to come to the little hse I want to know. I would rather people did not come to work the w/e esp w/out my permission

There is the old pool float that was in the pool that is broken - it is just tossed to the side of the Cabana - can he throw it away

The electric light under the pantry is hanging off the socket. Have him mend it

Have the cleaners take out every pot and pan and clean the shelves and the pots and pans this week

Frank/John are supposed to make a recommendation for a shed that we can leave behind the cabana which we can use for storage - pool stuff etc can you plse follow up

+ John again did not follow directions w/respect to the phone card. JE wanted the no's to read 'exactly as follows

'''7626 '7629 etc

ie instead of the whole no 655 7626 it was to be little ' + the end part of the no. have him change it. + before it gets done again, as I asked before I want it sent to me so i can approve it

G
