WATCH: In a Shocking Turn of Events, Flynn =oves To Take Down Pence.

An MSNBC panel says that =ormer National Security Advisor Michael Flynn has information that =ould take down Vice President Mike Pence. Flynn may have leaked =nformation that shows Pence and the Trump transition team knew that =oreign governments were paying him.

If this information turns =ut to be true, it would be a devastating blow to the Vice President♦=99s reputation. So far, Pence is untouched by the Russia =andal.

The prevailing opinion is that =ence didn't know anything about Flynn's calls to the =ussian ambassador to the U.S. And the administration's story is =hat Flynn lied about his Russian contacts to Pence.

But these =ew leaks fly in the face of all this. They suggest that Pence knew about all of Flynn's dealings with foreign =overnments and chose to ignore them.

Additionally, Pence was =he head of the Trump transition team and was supposed to vet all of Trump's appointees. So he should =ave known about Flynn's work with Turkey and =ussia.

So either Pence is incompetent, or =e's an outright liar. Neither is a good quality for a Vice =resident.

Washington Post reporter Karen =umulty also stated that Pence was in the Oval Office right before =resident Trump asked Comey to drop the Flynn investigation. So Pence =ay also have been involved in Trump's efforts to obstruct the =nvestigation into Flynn and the Russia scandal.

Flynn may not have finished with Pence, either. =loomberg Politics editor John Heilemann showed how Flynn can keep the =pressure on Pence.

Heilemann said, "Either he =Pence] knew and is lying or he did not know and was wildly incompetent. =ither way, not a great story for him."

"By the way, it seems to me the import of =his story is that Michael Flynn's lawyer came out a couple of =onths ago and said that Mike Flynn had a story to tell," =continued Heilemann. "He's now starting to tell that =tory."

POLL: Is the whole Trump administration going =own?

The Trump administration claims =hat Vice President Mike Pence didn't know anything about =ichael Flynn's work with the Russian or Turkish =overnments.

But Flynn has allegedly released =nformation contradicting these claims.

Heilemann suggested that Flynn might be leaking these stories =n order to get immunity. Flynn's hoping that he can prove his =tory is worth enough to gain immunity from prosecution.

"If this is the thing that he's =eaking, and there are other things that he's still holding to =ffer in exchange for immunity, that means this isn't even the =orst of it—that means he's got more things to say,"=said Heilemann.

If that's true, that means =here's more bad news coming for Pence and Trump. Flynn could =elp take down both men.

It looking more and more like =ence is also guilty of treason. So Congress should impeach Pence as =ell as Trump.

Unfortunately, that would put =ouse Speaker Paul Ryan in charge. But at least he's not in the =ussian President's pocket.

Flynn's trying to =et his revenge and take down the Vice President. Please share this =tory on Facebook to show that Pence isn't as innocent as =e've been led to =elieve.
