Cue. There are about 50 or so different acoustical materials that can be used for an aircraft. Each manufacturer has a different (or sometimes the same) way of instructing the installation of the material. My company was not the one who installed this material.

I'd like to give you kudo's on this, but honestly, I can't.

I will however make sure that the materials we suggest are installed properly.

Have a good evening Jeffrey J.<=:p>

The image is a small, horizontal logo for IJL (International Jet Leasing). It consists of the letters 'IJL' in a bold, italicized, serif font, with a small 'International' tagline underneath in a smaller, regular font.
