Jeffrey

If we put the screen in front of the window, we also have the air conditioning there so the screen will be "inside" =he room, and the seats will always be wrong

I thought, why not to put the globe cabinet in the main entrance and to make a cabinet with a large tv inside on lift, it would be the perfect distance from the sofa, the speakers will need to be changed

but will keep the same position so =ill avoid to have too much work in the room

Do you want me to study this =position?

Thank you

jean
