Jeffrey.,

Since the Klipch front L/H and R/H Klipch speakers appear to be working good, what do you think if we replaced the Front Center channel speaker and side surround speakers (R/H has blown speaker), since this is our weak link at this time?

install the Klipch P27C Palladium center channel speaker (weighs 52 lbs.) \$3,500.00 <http://www.klipsch.com/p-27c-center-speaker/details> <<http://www.klipsch.com/p-27c-center-speaker/details>>

Klipch P27S Mid Surround speakers \$4,000 pair <http://www.klipsch.com/p-27s-surround-speaker/details> <<http://www.klipsch.com/p-27s-surround-speaker/details>>
