Brice,

I'm still trying to find someone to help with you= archaeology queries. While looking, I came across this website  
that=has information on some sites on the property, including the hogback (call=d "El Creston" by archaeologists) and  
the large pueblo at the we=t end of the hogback (Pueblo Blanco). The "Sites" link in =he top right of the main page has  
more information.
