Jeffrey,

I've researched the market for alternatives to the 6500 Lbs. payload John Deere Pro Gators.

The closest thing in the size we are looking for with increased payload would be:

<=pan style='font-size:11.0pt'>

Toro Workman HDX with a payload of 3000 Lbs. @ \$32K

Polaris Brutus HD diesel payload 2200 Lbs. @ \$25K

=p class=MsoNormal>The remaining vehicles from Suzuki, Honda, Kawasaki, Yamaha and Arctic Cat are all in the 1100 – 1400 Lbs. load rating.

I have checked spare part situation with 2 different John Deere dealers and they both have all parts in stock for the Pro Gator. I made a few calls to people in the golf industry that I know. Pro Gator is the vehicle of choice for them.

Best,
