**Attachments:** image1.PNG; Untitled attachment 00105.txt

Hey Rich,

Due to power outages on St. Thomas Wednesday night our R/O plant shut down o= LSJ & the water maker shut down on GSJ.

Danny and Smiley tried to get it back up on Thursday but no luck. Danny have=been speaking with Dave from Reefco and Bob from TSJ about the situation. B=b from TSG will come out to check the R/O plant and David from Reefco will c=me out to check the water maker on GSJ.

I've asked Danny to please send me an email regarding his findings about the=R/O Plant to help us understand what part went wrong.

I have 5 Truck loads (5k gal. each) of water coming over on Sunday to fill L=J cistern, at the moment we are at 40 inches of water but if we go under 25=inches we would have to shut all pumps off.
