It=has in on ly the first two paragraphs, three numbers from three separate =ates -weeks and months apart and then they add them together. ? june 3= financials. is 1 date it says stock price of 18, different date and= then put s in 19.20 per share.for a third date . THEREFORE   all sum= inaccurate. mix specific today numbers with rounded future project=ons. . all it would take is to put in todays numbers consistantly as it =should always be done. it should be a snapshot . not a conglomeration.= and easily done with the correct IT program.
