No =roblem for removing blurry.

Regarding the apple TV, = can add them. But as i remember you don't have any network (RJ45) =lug for each TV.

It means Apple TV would have =o work over wifi, it works but it is slow. I remember we already had =ssue about network when thinking about =onos.

Regarding the location of the screen in =ome theater, is i understand correctly, you would like to put it on the =ight wall when looking at the existing projection screen. I think it =ay be difficult to run cables there.

I will =update the estimate, removing the bluray, adding the Apple TV. Then if =ou are ok, i'll come again on site to check the locations and the =etwork.

I will add the crestron for master =edroom and home theater.

Best =egards

Dear Jeffrey,

Please =ind attached the estimate regarding our last meeting.

I have proposed the 75" TV for home theater and =our bedroom.

I can't find the paper where i =rote the exact available dimension in home theater. I remember 169 cm =ut i'm not sure. Could you please ask valdson to confirm.

The size of the TV is 167 cm wide. So if i'm correct it fits.

For the guest bedroom, i have a 55" and a 65" as we discussed.

Each time i proposed an oppo bluray player, the only multi zone product on the market.

As an option (not included in the total) i proposed to replace the old crestron, with a new small model.

I am waiting for your feedback

Best regards

Philippe
