**Subject:** Get Threema, a secure messaging app

Hello,

I just got Threema, a secure messaging app for the iPhone. It uses end-to-end encryption so that only the recipient that I've chosen (and not even their servers) can read my messages.

It can send text messages, pictures, videos and even lets me share my location in a very secure way. It also syncs with your address book (if you let it to find other Threema users automatically. And of course the messages are free).

Get it now from <http://threema.ch/download> so we can start exchanging messages that can't be snooped on by some random company or government!

Oh, and let's exchange keys the next time we meet just to be extra safe. It's really easy, just scan a code from somebody else's mobile.

Cheers,

Sent from my iPhone=?xml version=.0" encoding=UTF-8"?> <!DOCTYPE plist PUBLIC "-//Apple//DTD PLIST 1.0//EN" "http://www.apple.com/DTDs/PropertyList-1.0.dtd">
