Subject: Road Project - October 16, 2015

Greetings Sir,

Boyson is back in service as of today. We spoke with the transportation coordinator this afternoon and he is ready to accommodate us.

We also spoke with Mr. Jeffers about the schedule to recommence with the crusher run, with your permission.

Mr. Jeffers will need his mechanics to come out to check the equipment and to coordinate the truckers and crusher run pickup. He can start on Wednesday, 10/21, and complete the 20 loads by Friday, 10/23, weather permitting and your approval.

We know you did not want to be here for this project, so would you prefer that we shift everything for when you leave, or may we recommence on Wednesday, 10/21?

Respectfully, Daphne
