Jeffrey

Dave and I will depart Miami at 6:40pm tonight and arrive St Thomas at 10:20pm if this is OK?

The next earliest flight is 12:20pm out of Miami.,

BBJ info

-BBJ cannot display X= weather or Jepp Charts like DU885., -BBJ has CatIII autoland and= Autothrottle

Subject= BBJ

Can a BBJ display Jepp charts on their tubes?=/span>

Our BBJ is equipped with 2 NavAero EFB Class 2=(Electronic Flight Bag), which display's all Jeppesen charts and ha= also the OPT (Operation Performance Tool) installed for pilot usage. No BB= or B737 can display any Jepp charts or OPT on the cockpit display units, t=ey must be equipped with an EFB or an approved usage of iPad's. Kin=ly find attached a picture of our current BBJ cockpit.

=div>

D=es all BBJ's have autoland? Does the one your selling have auto land?<=/ont>

Yes, all BBJ's (and also our BBJ)=are equipped for Cat 3 autoland. They have an HUD (head up display unit) in=talled on captains side (refer as well to the attached picture) and can be u=ed by the pilots as long they have an approved training.
