Both agencies recommend best practices to enhance your organization's cyber security posture.

IMG can conduct a preliminary review of your company's IT system. IMG will forward to your company's IT staff a straightforward questionnaire (20 questions) that will provide a general overview of your company's IT posture. After analyzing the questionnaire, we will work with your IT staff to conduct a review of your network. This review will be both on-site and off-line and upon completion a report will be prepared detailing the findings and recommendations.
