**Subject:** Hello! It's [REDACTED]

Dear Jeffrey! I hope you are doing well and your body feels great after a trial thai massage session by the girl!=  
As far as I understand your schedule is busy and that is why I'm reaching via email and here's the information I got by now.

In order to become [REDACTED] and get a license in the future=one has to have the education recognized by [REDACTED]

In my case, the diploma can be equaled either to a Bachelor= or to a Master's here in the US but it won't be recognized by NAAB which means it doesn't help a lot. So as I said before I will have to take a Master's program in the US.

Currently= there are a few schools that with Master's accredited [REDACTED]

City College Of NY

Columbia

Pratt

<=iv style="color:rgb(0,0,0);font-family:-apple-system-font;font-size:12px;line-height:16px">Par=ons

And a few more that are in state of NY but not in NYC.

The first three have a 3-year full time program and Parsons has a 2 year program. All the programs are expensive. For instance, Columbia is 26,50= per term (6 terms total), City College is 870 per credit (18 credits per term for 6 terms), Pratt is 46,172 a year (3 years as well) and Parsons is =3,000 per term (4 terms) plus this doesn't include fees, books and=software etc.

The applications for the program are closed =or this Autumn and the only option to enroll is Fall 2017.

All the institutions require TOEFL and GRE and also I will have to go [REDACTED]=and do all the paperwork with my diploma.

=font face="Verdana, Arial, Helvetica, sans-serif">So as you see, it =80 s a lot of money and that is why when you asked me about studying before I was thinking what are the «fast track» options. But they didn't mention this not. That is why I never considered this because I =always knew that money wise it's very unlikely that I could ever afford that.

Regarding CAD courses - there are a few=that Pratt offers as a pre-college addition and you can choose which program do you want to learn. They typically start May 20th-May 25th and last until the end of July. Each CAD program course is 905USD and I will probably need to buy a computer and software.

That =99s what I wanted to tell you and hear what do you think I should do.

Looking forward to hearing back from you soon, [REDACTED]
